Finish Capabilities

For years, the architectural community has recognized the following standards for testing and performance of organic coatings on architectural aluminum extrusions and panels.

AAMA 2603, "Voluntary Specifications, Performance Requirements and Test Procedures for Pigmented Organic Coatings on Aluminum Extrusions and Panels."

AAMA 2604, "Voluntary Specifications, Performance Requirements and Test Procedures for High Performance Organic Coatings on Aluminum Extrusions and Panels."

AAMA 2605, "Voluntary Specifications, Performance Requirements and Test Procedures for Superior Performing Organic Coatings on Aluminum Extrusions and Panels."

WinTech has the ability to provide painted finishes in 2603, 2604, and 2605. Let us know your finishing specifications and we will choose the best option for your project!

As well as standard colors, WinTech can also supply custom color paint matched from your supplied color chip.

Class I Clear and Bronze Anodize per AAMA 611 are also available.
